> BELL'S ASBESTOS EASTERN AGENCY, LTD.

The fourteenth ordinary general meeting of the shareholders of Bell's / sbestos Eastern Agency, Limited, was held at the offices of the company, 79, Gracechurchstreet, London, on July 7, Mr A. G. Angier

(Chairman of Directors) presiding. The Chairman said : Gentlemen. - 1 pre sume that as usual you will take the report as read. Before dealing with other mintters I would refer for one moment to one or two figures in the balance-sheet. It will be observed that the net profit for 1908 is not quite so good as for the previous year's working, but the year 1908 does not figure as a record one in the balance-sheets of most companies, and we must not complain when in such a period our figures are slightly below the level of the previous year. You will see that by the allocation of the disposable balance shown in the profit and loss account proposed by the directors for you to pass to-day, we intend to finally deal with the item under the heading of "Purchase of Trading Rights." This, I may say, was the consideration for obtaining the charter under which the company has been trading, and that it is now all written off may, I think, be considered as satisfactory. The amount of the debenture bond you will see is decreased by £500 since the last balance sheet. Since the figures were made up, as at Dec. 31 hast, a further sum of £500 has been paid off, which will be exhibited in the accounts for the current year. The sum now out-"standing in £500." The debenture was originally, for £5,000, and, as some shareholders will know, was practically capital that it has been almost repaid may, the directors also hope, be considered satisfactory. Turning now to the general conditions, the year 1908 was not a red" letter year in the Far East. In common with the Test of the world, which felt the aftermath of the upheaval in the United States in the autumn of 1907, the con-

ditions were not prosperous. Speculation and overtrading at an antecedent date had left their mark, and a residue that had to be liquidated. That liquidation, I am glad to believe, has been practically accomplished to a great extent, and the directors trust that they may look forward to an era of improved conditions, in which they hope the company may secure its share. Reverting again to the accounts, we propose to maintain a like rate of dividend to that distributed a year ago. The reserve fund remains at £1,500, which, I may remark, sis nearly 30 per cent. of the capital of the company. The stocks of goods have somewhat increased, but have been carefully valued. The general financial position of the company, as exhibited by the balance sheet, will show, on analysis, that the company has worked itsef up into a position that, is sound. With the improved conditions, which we are looking for, and with some further resources, the directors hope to be in a position to develop business in directions that it has not been hitherto possible to exploit. Before concluding, would mention, as the report states, that the agreement with the parent company expired on Dec. 31 last. A new agreement has been entered into for a period of 10 years, with option of renewal four a like term of 10 years. Generally the new agreement is on similar lines to that originally made, which was the basis on now beg to move "That the report of the directors and the annexed statement of the company's accounts at the 31st December, 1908, duly audited, be new received, approved, and adopted," but before putting the same I shall be pleased to reply to any questions shareholders may desire to ask. Mr H. R. Preston seconded the motion, which was carried unanimously. "The Chairman then moved : " That a

dividend of 15 per cent. be declared out of the profits of the company for the twelve months ending Dec. 31, 1908." Mr Preston seconded the resolution which was also carried unanimously. Mr Ward proposed a vote of thanks to

the Board for their good management of the company, and at the Chairman's suggestion, included in that resolution the staff working abroad,

From the port of Taverpool Mr Percy Topham, a young Lancashire spor'sman has just started on a five or six years sporting tour aboard his own vessel, the Free Lance, a stout little ship of seventythree tons. Aboard are all the gear required for shooting, hand travel, fishing and trapping. The Free Lance has already been tried in rough conditions and has weathered a terrific hurricane off the Labrador coast so her owner is justifiably proud of her seaworthy qualities. She has been painted white and from her masthead dies a brand new Union Jack, while her equipment is on the completest lines

Mr Topham is no novice at adventure He has engaged in sport in nearly every part of the world, and he believes in travelling like this in order to avoid the beaten track. "Such expeditions are very interesting" he says, "and the loneliness soon wears off. I usually grope about in a sparsely populated district and seek information from all sorts of people. There are always some, if looked for, who can tell me what I want to know, and I then go ahead and form my own conclu ions. On this trip I have most hope of good sport in the Sunderbunds of the Ganges delta. Southand may see some section of the fleet. by walking to the Embankment.

In addition to this is the attempt to fly across the Channel by Mr Lathum with his acroplane, with which he is making trial hights, to the great delight of visitors to the South coast. New nortal inventious are coming in upon us in a veritable cloud. Dr Boyd has an airship that is to be floated with millionaire backing. Dr . lexander -Graham Bell, of telephone fame had so far demonstrated the utility of his tetrahedral model at Baddeck, Nova Scotia. that the Canadian Militia Board is about to test it officially at their reservation at Putowawa Camp. Over the border in America there are at least half a decen new men who claim to have better machines than the Brothers Wright, while in Gormany the Government has taken up the Zeppelin airship which, though it has done some wonderful flights, has merely shown that at present the invention is liable at any moment to go wrong, especially in its engines. The two accidents that have occurred to it have been due to the engines: fusing, which proves that they are not yet strong enough for the propulsion of the great airship in the face of a wind. That leaves the general utility of airships for military purposes a long way on the doubtful side, and though it is not well for the British authorities to be as backward as they are, in comparison with other nations. it is the opinion of many, military experts that the craze for military airships is at present more a matter of sentiment than

actual necessity. The prospect of a settlement in the dispute between the Scottish mine owners and the miners is remote, but there is a very good chance of avoiding a general strike of miners all over the country. Many of us rushed our orders for coal a week ago in fear lest the supplies would be short for months to come. Suce then there has been temporary suspension of hostilities but the owners are determined to reduce wages and the men are just as uncompromising in their adherence to a living minimum wage. It may be added that much of the trouble arises out of the Eight Hours Bill for miners, for the owners contend if they have to run on those lines they have to readjust their

Another important step in the direction of improving the efficiency of the Territorial Army is, says the United Services Gazette, about to be taken by the Army Council. The efficiency of the Army depends very largely, of course, upon the ability and training of the officers, but even with the most conspicuous ability and intelligence an officer cannot be expected to be, able to discharge his responsible duties to the best advantage of the nation unless he has a fair share of practical training. is the intention of the Army Council to attach a number of Territorial officers to Regular units in the Army Manceuvres this year, and as far as possible, to associate them with units of the army commands to which they belong

The reverend of India have within the last four weeks critic quotes Sir Mannaya Rio, one of been saying and writing. There can the few great statesmen that India has produced, to the effect that his country's poverty is "self-inflicted, self-created, or | English to India has brought many self-accepted, and therefore avoidable. Would not any country be povertystricken that had \$2,600,000,000 (U.S. currency) of hoarded money buried in the ground? If this vast sum were to be restored to circulation and to the promotion of industry it would exert a" magical effect. Add to this the further enormous wealth that is annually converted into jewels, even among the common people; the senseless waste of money upon marriage and other leasts; the willing maintenance of an army of

5,500,000 religious ascetics, and the Hindu's insane passion for litigation, and three-lourths of India's poverty will be understood. Great Britain has been blamed by small-minded critics for the Indian famines whereas, ever since the con-TELEFHONE No. 27. tinents settled down into their present shape there have been famines in India,

condition of the atmosphere in the day. mountains of Africa. If the famines are bad to-day, what must "they have been before Britain poured her millions into relief work, and built a regular system of railways for the purpose of rushing supplies into isolated, stricken districts? In regard to another point Mr. Jones says:-"We must also emphasize the incomparable irrigation

works of India. It surpasses all other lands in this particular. By the Chenab irrigation scheme, in the Punjab, two and one balf million acres of was land, without an inhabitant, have been recontly transformed into a fertile garden with two hundred thousand inhabitants. In the district in which the writer lives in South India, the Periar irrigation scheme, completed a decade and a half ago, feeds four hundred thousand people, and has made the

district which was dependent in the past upon other districts for its food to he more than self-supporting. Millions are being expended annually by the

Government in its irrigation scheme.' Any tax upon so poor a people would seem to be cruel, yet how is the State to be maintained without it? The average land tax of India is only. 5% per cent. upon the gross crop, and in bad sessons there are extensive remissione. The tax on salt, which has been regarded as the most obnoxious of all, since it, affects the necessities of human life, has been steadily reduced and only amounts to six and a half cents per capita a year. The grand total of taxation comes to 84 silver cents per head, NATURALLY such a striking event as the and on an average income of \$20 murder of Sir Conzon Wyllie in the this is only 4, per cent. DARING ROBBERY IN

HONGKONG. The police have been informed of a most daring robbery which occurred in broad daylight yesterday in Chancery Lane. appears that about three o'clock in the afternoon a middle-aged Chinese woman was walking along the thoroughfare named when a man snatched her umbrella from her and dashed through the doorway of a house close at hand. This was evidently part of the plan laid by thieves, for on the woman following him two other men appeared on the scene and promptly shut the door behind her. They then clutched her by the throat in order to prevent her from giving any alarm and then thrust a gag into her mouth. This done, they proceeded to relieve her of her jewellery, which consisted of four very fine pairs of gold bangles and three gold rings of the total value of \$373. They then made off and left the woman lying in a semi-conscious state at the foot of the stairs, where she was later found by the occupant of the house, a Portuguese lady.

NEWS FROM ALL SOURCES.

During an election address at Mid-Derbyshire Mr. Oresawell, the Unionist candidate, stated that Mr Keir Hardie's speeches had fed the seditions movement which had culminated in Sir W. C. Wyllic's murden Mr Keir Hardie announces his intention of bringing an action for libel.

The first Chinese Consul-General appointed to Canada, Kung Hain-chao, in the course of an interview said he had been sent to Canada to improve commercial relations between that country and China. and he hoped that China would shortly be importing large quantities of Canadian wheat and lumber.

At the second annual show of the Peking Palace Dog Association, held at the Royal BotanicGardens, Rogent's Park, on the 29th June, Chu-erh of Alderbourne, owned by Mrs C. Ashton Cross, of Egham, carried off Newchwang. the 100 guines challenge cup presented by Mr Pierpont Morgan. Mrs Ashton Cross stated that she had refused £5,000 for Chuerh, and had oven had a blank cheque offered her in vain. The Chinese Minister is, naturally, an expert in this breed, and he remarked that he had seen several dogs in the show that were sufficiently good to adorn the royal palace at Peking. "There are plenty of dogs in China," his Excellency | ST said, "but only perfect specimens are kept | H in the palace, where very large sums of money are paid for them."

In recent interviews the Emperor William M has, says a L. and C. Express correspondent, made it clear that he remains faithful to his original conception of a federation of all the civilised States for the greater economic development of each, and if he spoke formerly of the Yellow Peril, this was evidently for the purpose of showing the danger of European division in face of new worlds, which arise with so many natural advantages over the old world. His Majesty is described as rejoicing at the Dinlug Saloon. improved relations between France and Germany.

Sir William Richmond, presiding at the annual meeting of the Coal Smoke Abatement Society, said that Westminster Abboy had suffered from more rapid decay in the last hundred years than occurred in all the years of its history. Repairs executed only from 20 to 25 years ago were decayed more or less, and that done in 1701 showed signs of being reduced to a friable mass to a considerable depth below the surf ce. This docay, he said, was the result of acids deposited by smoke and otherwise.

Dull as the shipbuilding industry on the Clyde has been, the statistics for the half-year ended June 30th show an improvement over the corresponding period. The launches during June numbered 28, of 19,700 tons, bringing the total for the six months up to 150,700 tons, as compared with 144,000 tons in 1908. The new contracts reported during the month total only some 10,000 tons.
